

## Parking lot USB exercise

---

<b>Contents</b>	<ul style="list-style-type: none"><li>• There are files containing PII as there are folders containing Jorge's family photos and pet photos.</li><li>• Also there is a sensitive work file named new hire most likely containing information about new recruits at the hospital.</li><li>• It is not safe to save work files along with personal files.</li></ul>
<b>Attacker mindset</b>	<ul style="list-style-type: none"><li>• The information can be used against the newly recruited employees.</li><li>• The information can be used against relatives as there are photos of them.</li><li>• The information can provide access to the business</li></ul>
<b>Risk analysis</b>	<ul style="list-style-type: none"><li>• The USB might be infected with a virus or worm that can be very dangerous. If the infected was infected and it was discovered by another employee and they inserted it into the org's system it can lead to unauthorized access.</li><li>• They can find different things like personal photos, passwords, emails, usernames and other PII as well.</li><li>• This information can be used for identity theft, financial fraud.</li><li>• Awareness should be raised against these type of attacks and employees shouldn't pick these type of devices.</li></ul>
